

E-Z Flow Foam Product Line Overview

Smart, Reliable, and Cost-Effective Protection for Every Product

The E-Z Flow Foam product line delivers high-performance foam-in-place packaging solutions engineered to protect products of all sizes and weights. From delicate consumer goods to heavy industrial components, E-Z Flow Foam ensures consistent quality, easy handling, and superior product protection — every time.

Product Lineup

Product	Description	Ideal Product Weight Range	Industries
EZF 0.75	Our lightest formulation for delicate or lightweight goods where minimal foam volume is needed.	Up to ~30 lbs	Consumer Goods, Electronics, Medical Devices
EZF 1.0	Medium-density foam offering a balance of flexibility and firmness — perfect for most general packaging applications.	45–100 lbs	Consumer Goods, Electronics, Automotive Parts, Medical Devices
EZF FLEX 1.0	Soft, flexible foam designed for lightweight or irregularly shaped products. Excellent cushioning and impact absorption.	Up to ~45 lbs	Consumer Goods, Electronics, Medical Devices
EZF 2.0 Slow	High-density, slow-reacting foam that expands to fill large voids and provides maximum protection for heavy or fragile products.	100–250 lbs	Electronics, Automotive Parts, Industrial Equipment, Medical Devices
EZF 2.0 Fast	Same density and strength as EZF 2.0 Slow, with a faster reaction time for higher throughput and efficiency.	100–250 lbs	Electronics, Automotive Parts, Industrial Equipment,

Key Benefits

- **Superior Protection** – Expands to form a custom mold around your product.
- **On-Demand Efficiency** – Reduces waste and labor time.
- **Versatile Performance** – Protects items from 30 lbs up to 250 lbs.
- **Consistent Quality** – Reliable results in varying conditions.
- **Cost Savings** – Minimize damage claims and material costs.
