# ENGINEERED FOAM FOR RELIABLE BUOYANCY IN MARINE APPLICATIONS

U.S. Coast Guard compliant flotation foam, designed to be the backbone of safety for any watercraft or vessel. This highly versatile foam is perfect for filling buoys, pontoons, floating docks, barges, boat hulls, and other flotation devices. Our 2.0 FS, 2.0 SL and 4.0 densities can be used with our E-Z Flow low-pressure equipment as well as any high-pressure equipment.

## E-Z Flow: Trusted Foam Solutions Backed by American Polymers

E-Z Flow delivers high-quality, American-made polyurethane foam systems backed by over 1,000,000 sq. ft. of manufacturing facilities across American Polymers Network. Our simple, reliable, and cost-effective equipment, accessories, and foam densities provide tailored solutions for any application. Trusted worldwide, E-Z Flow makes packaging and foam-in-place easier, safer, and more efficient.

### ADAPTABILITY

Our foam conforms to any shape or cavity, ensuring a perfect fit and reliable buoyancy for both irregular and standard designs

### REAL WORLD SUCCESS

Our flotation foam proved its utility in emergency and salvage operations when a customer successfully salvaged an expensive barge using our foam and equipment

### RESTORATION PROJECTS

Our flotation foam adds necessary buoyancy to older boats, ensuring compliance with current regulations and enhancing safety

### COMPLIANT WITH USCG APPROVALS

Our foam meets strict U.S. Coast Guard standards, ensuring your watercraft and flotation devices are both effective and safety compliant
